ABOUT ME

I'm a product designer with 7+ years of experience in building fintech, communication, and retail products, built on a broader 15+ year design career across the U.S. and Europe. Currently leading a team designing management platform for retail businesses. I focus on real user problems, work iteratively, and keep design tied to outcomes that matter.

EXPERIENCE

2024–Present: Design Lead — IDT Technologies (Warsaw, Poland)

NRS is IDT's point-of-sale platform: the register and back office for around 34,000 independent US stores.

- Leading a team of 4 designers in overhauling the design for a retail platform used by convenience stores, retail shops and restaurants
- Integrating AI-assisted design and agentic workflows into everyday practice, from functional prototyping to faster design iteration
- Identifying and fixing gaps in an outdated system that no longer meets business needs, while creating shared assets for consistent cross platform use
- Expanding the Android platform to iOS and Web
- Building new design systems based on Google's Material Design and Vue
- Redesigning UX flows for POS, store, and stock management systems
- Balancing legacy design with short-term fixes and long term modernization
- Working with engineers to ensure scalability and technical fit

2022–2024: Senior UX/UI Designer — IDT Technologies (Warsaw, Poland)

BOSS Money is IDT's remittance app, sending money home to 50+ countries. It crossed 2 million transfers a month while I was on it.

- Redesigned a global fintech money transfer (remittance) app, improving onboarding, transfers, top-ups, and account management
- Built and maintained a scalable design system and UI libraries
- Designed B2B platform features including multi-user accounts, role based access, and enterprise management tools

2020–2022: Middle UX/UI Designer — IDT Technologies (Minsk, Belarus)

- Designed UX flows for a VoIP and text messaging app targeting US market
- Built the first UI kit and foundations for a new design system
- Adapted mobile native UX flows for a web portal
- Collaborated with stakeholders to ensure user centered design and supported early product builds

2019–2020: UI Designer — Huawei Technologies (Minsk, Belarus)

- Led regional design support for marketing and corporate campaigns, delivered consistent brand experiences across platforms using global standards
- Produced digital and printed materials including campaign key visuals

2010–2019: Designer — Freelance Practice

- End-to-end design services for startups and small businesses
- Brand identity development, web and graphic design across industries

2008–2017: In-House Designer — Fairview Health (Minneapolis, USA)

- Created visual materials for healthcare campaigns, patient education, and internal communications
- Managed visual brand standards across multiple departments for healthcare communications within a highly regulated industry
