ABOUT ME

I'm a product designer with 7+ years of experience in building B2B, B2C, SaaS products in fintech, communication, retail and other domains. This builds on a broader 15+ year design career across the U.S. and Europe. I'm good at systems and product thinking, tracking outcomes, end-to-end delivery, and making sense of complex data sets. I focus on real user problems, work iteratively, and keep design tied to trackable outcomes.

IMPACT

- Rebuilt the fintech app zero to one on the existing backend, replacing an obsolete legacy design without losing customers; Google Play rating rose from 3.9 to 4.9 within a year
- Designed the UX/UI for a new in app referral program; action rate reached 85% against 41% before
- Led design for a retail POS platform used in about 34,000 independent US stores
- Created multiple design systems for accelerated and consistent design and development
- Moved the team's prototyping and daily design work onto AI and agent driven tools
- Set up design review and other team rituals, mentoring, and alignment between stakeholder requests and team delivery

EXPERIENCE

2024–Present: Design Lead — IDT Technologies (Warsaw, Poland)

IDT provides a point-of-sale platform through National Retail Solutions (NRS): the register and back office for around 34,000 independent US stores.

- Leading a team of 4 designers in overhauling the design for a retail platform used by convenience stores, retail shops and restaurants
- Integrating AI-assisted design and agentic workflows into everyday practice, from functional prototyping to faster design iteration
- Expanding the Android platform to iOS and Web
- Closing gaps in a legacy system with short term fixes and long term modernization, while creating shared assets for consistent cross platform use
- Building new design systems, to be used with Kotlin Multiplatform and Vue.js
- Redesigning UX flows for POS, store, and stock management systems
- Working with engineers to ensure scalability and technical fit

2022–2024: Senior UX/UI Designer — IDT Technologies (Warsaw, Poland)

BOSS Money is IDT's fintech app, providing a wallet and money transfer to 50+ countries. It crossed 2 million transfers a month while I was on it.

- Designed and refined the app end to end
- Delivered UX flows for onboarding, transfers, top-ups, the customer inbox, KYC verification and account management
- Built and maintained a scalable design system
- Designed B2B features for *zendit*, IDT's SaaS platform: multi-user accounts, role based access, and enterprise management tools

2020–2022: Middle UX/UI Designer — IDT Technologies (Minsk, Belarus)

- Designed UX flows for a VoIP and text messaging app targeting US market
- Built the first UI kit and foundations for a new design system
- Adapted mobile native UX flows for a web portal
- Collaborated with stakeholders to ensure user centered design and supported early product builds

2019–2020: UI Designer — Huawei Technologies (Minsk, Belarus)

- Led regional design support for marketing and corporate campaigns, delivered consistent brand experiences across platforms using global standards
- Produced digital and printed materials including campaign key visuals

2008–2017: In-House Designer — Fairview Health (Minneapolis, USA)

- Created visual materials for healthcare campaigns, patient education, and internal communications
- Managed visual brand standards across multiple departments for healthcare communications within a highly regulated industry

SKILLS/TOOLS

AI: Agentic Workflows, Claude Code, AI Design Harnesses, MCP, Design Systems as Context

Design: Interaction Design, Visual Design, Information Architecture, User Flows, Wireframing, Prototyping, Design Systems, Accessibility

Tools: Figma, LLMs, GitHub, Adobe CC, Amplitude, Miro, Agile, Jira, Confluence

Research: User Research, Usability Testing

Languages: English (C1), Russian (Native)

EDUCATION

Minneapolis Community and Technical College
Minneapolis, USA
Front-End Development Certificate

Belarusian State Economic University
Minsk, Belarus
Bachelor's Degree in Accounting and Economics
